Great Dive Spots of the Azores

The islands of the Central Group of Archipelago of the Azores (Faial, Graciosa, Pico, São Jorge and Terceira) offer more than 50 dive spots. There are different sites for various interests and levels of diving; there are **diverse types of caves** and geological formations, **diverse marine species**, archaeological wealth and the banks Princesa Alice and D. João Castro. The average temperature of the seawater is 16° C to 22° C and highs of 23° C to 25° C with visibility to 30 meters.

You can choose from 11 diving centres spread across the five islands to dive in the Central Group. There are also many other activities such as **whale and bird watching, landscapes and trails, history, volcanic formations** that can be visited and a rich gastronomy available to divers and their travelling companions.

Whether at sea or on land The Azores have a lot to offer, find out how to visit us at www.artazores.com or ask here (artazores@gmail.com)
